OBJECTIVE

I'm an aspiring junior front-end developer. Though I'm just a beginner, I'm really committed to my work.

I expect to get full time job on a long-term basis. It's important for me to have a modern technology stack > JS, ES, React.

SKILLS

Technologies: HTML, CSS, Flexbox, SASS, Adaptive design

Related technologies: Basics of Photoshop for coder, graphic optimization, retina support

Methodology: BEM

Frameworks/Libraries: jQuery, React.js, Angular 2 on basic level

Version Control Systems: GIT

Programming languages: Javascript, ES2015-ES 2017

Build tools: Gulp, webpack

Extras: Command line on basic level, NPM, Yarn, VIM, Chrome dev tools
